AMUR REGION  
IS THE FAR EAST'S  
LEADER IN ATTRACTING  
INVESTMENT

DIGEST

Dear friends,  
I am glad to welcome participants and guests of the international economic forum "AmurExpo" to Amur land!

AmurExpo is gaining weight every year as an effective platform for building new international relations and developing existing agreements. Representatives of federal authorities, the diplomatic corps, governments of other countries, large Russian and foreign corporations, development institutions and business associations are showing great interest in the forum.

Of all Russian regions, the Amur Region has the longest border with China - 1,250 kilometers.

*Today, the region has become an important center for the development of Russian-Chinese cooperation, as well as a new international transport corridor to the countries of the Asia-Pacific region.*

The main transport flows connecting the western and Siberian regions of Russia with the Far East and the markets of North-East Asia pass through our territory. Transport infrastructure is actively developing here. The international Blagoveshchensk - Heihe road bridge across the

Amur River is operational, and construction of a unique cross-border cable car is underway. A wide range of regional preferences and benefits has been developed for investors, and a preferential regime for priority development areas is in effect.

Over the past five years, the Amur Region has achieved historical records for investments in fixed assets and, by the end of 2023, ranks 1st in this indicator in the Far East! By decision of the President Vladimir Putin, investment projects of a federal scale are being implemented on our territory. Despite sanctions pressure, the largest gas processing plants in Russia, the Amur Gas Processing Plant and the Amur Gas Chemical Plant, are on schedule, the second stage of the Vostochny Cosmodrome is being built, and the Eastern Railway is being modernized. We are proud of the results of our work and continue to work for the benefit of our native region.

I am sure that on the fields of AmurExpo, participants and guests from different countries will be able to find new partners, discuss joint promising projects, consolidate and develop existing agreements, and generate interesting ideas. We wish all participants and guests of AmurExpo a good mood, pleasant communication and productive work!

# «AMUREXPO» — FROM MARKET TO THE EEF OFFSITE PLATFORM

The history of the Russian-Chinese forum dates back to 1992. At that time, it was first held in Blagoveshchensk, the capital of the Amur Region, choosing the format of an international fair. The event proved to be in demand, and in the first year exhibitors from Russia, China, North and South Korea, Hong Kong, Taiwan, Japan, Israel, Poland and six CIS countries took part in it.

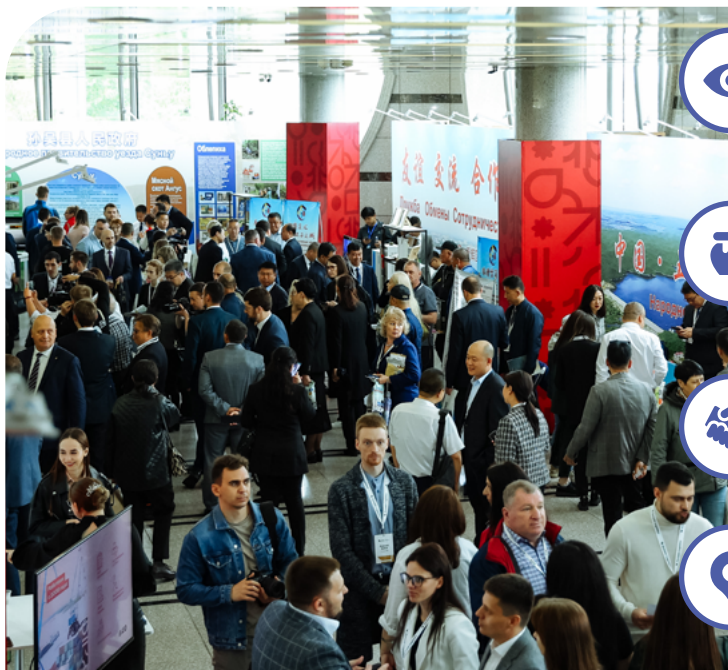

Today, more than 30 years later, «AmurExpo» is the main event in the business life of the Amur Region, an international platform for finding partners, investors and suppliers, and jointly exhibiting products. By order of the President, it has become an offsite venue of the Eastern Economic Forum.

As part of the «AmurExpo» business program, participants receive information on key projects of Russian-Chinese cooperation, trade and logistics development prospects, discuss new initiatives and practical issues. This brings impressive results. In 2023, «AmurExpo» gathered more than 150 exhibiting companies and over 10,000 visitors. Companies signed more than 20 agreements and three memorandums totaling 22 billion rubles.

As a result of «AmurExpo», 16 companies from the Russian side and the same number from the Chinese side agreed on further cooperation.

The forum sites operate on both banks of the Amur River - in the capital of the Amur Region and in the border town Heihe.

## PARTICIPANTS OF THE RUSSIAN-CHINESE FORUM «AMUREXPO» - 2024 HAVE THE OPPORTUNITY TO:

To learn more about a number of transportation and logistics facilities within the framework of the project «Amur Corridor: New Opportunities for Business Development and Russian-Chinese relations».

Visit expositions on key areas of regional development and international cooperation, major investment projects and business support

Get acquainted with products and services of Russian and Chinese manufacturers in the categories: TourExpo, BusinessExpo, IndustrialExpo, TechExpo and FoodExpo

Participate in B2B negotiations with businesses in different industries

Learn about the key territories of the Priamurye region for travelers, the main tourist products and offers for the tourist season of 2024

# AEF FORUM-2024 BUSINESS PROGRAM (12+) ARCHITECTURE

The program of events can be found on the website [amurexpo.ru](http://amurexpo.ru) (12+)

## THE VALUE OF INTERSTATE PARTNERSHIP IN THE NEW MULTIPOLAR WORLD. FAR EASTERN PRIORITIES

- › Development of the principles of modern multifaceted international cooperation between Russia, China and other countries
- › Using the unique geography of the Amur region and the accumulated experience of interregional cooperation in the Far East for mutually beneficial cooperation
- › Events of BRICS, SCO and other interstate associations
- › International priority development territories, legislative issues, joint projects and initiatives
- › Implementation of instructions of the President of Russia in the focus of the Far East
- › The Amur Region is a gateway for cooperation with China and Southeast Asia/Asia Pacific countries

## CREATIVE FAR EAST: PROSPECTS FOR THE DEVELOPMENT OF THE FACING EAST CREATIVE ECONOMY

- › The Far East as a territory for the development of creative business. How to calculate the economic potential of the regions of the Far Eastern Federal District in creative industries?
- › Creative industries as a tool for preserving traditions and creating new national brands
- › Where to find creative industry consumers in the Far East - strategies, development plans, problems and solutions
- › Personnel for the creative industry - how talented youth can find themselves
- › Orientation to the East: a new vector of international cooperation and export of creative products
- › Systematic measures to support and accelerate projects for the development of the creative potential of the Far East

## MEETING OF THE GOVERNOR AND MEMBERS OF THE GOVERNMENT OF THE AMUR REGION WITH REPRESENTATIVES OF FOREIGN DELEGATIONS, BUSINESS AND THE PUBLIC

- › Investment attractiveness of the region, current situation and plans for further development
- › Open communication in question-answer format
- › Mutually beneficial cooperation and communications: tools and methods of implementation

## FAR EASTERN STRATEGIES: BUSINESS INTERACTION AND INTERNATIONAL RELATIONS

- › Opportunities and main directions of cooperation between Russia and the countries of Southeast Asia, based on the national specifics of each state
- › “Rules of the game”: incentives for foreign investors, preferential national zones with low taxation, foreign trade incentive system
- › National characteristics of communication with government officials and businessmen
- › What does today’s food and trade agenda look like in the Far East? Practice trends
- › New markets and long-term business cooperation projects
- › Organization and holding of joint multi-format events
- › Commercial projects and projects in the field of culture, science and education. Balance of interests or synergy?

## COMPREHENSIVE DEVELOPMENT OF THE TERRITORY. LOGISTICS AND TRANSPORT. INFRASTRUCTURE PROJECTS

- › Cross-border trade, checkpoints, transport and trade services
- › A set of priority measures for the development of the railway infrastructure of the Eastern range
- › Development of territories of the Far East taking into account the international agenda
- › The Amur Region is the most important cross-border multimodal transport hub. Current transport corridors and prospects for the development of links between Asia and Europe
- › Modern logistics and transport systems: complexity of management, personnel issues, development of modern digital services

## INTERNATIONAL TOURISM IN THE FAR EAST - BRAND OF TERRITORIES AND INFRASTRUCTURE DEVELOPMENT

- › The uniqueness of the Far East for travel and the development of the tourism industry
- › The brightness of the attractive image of the territory and the development of a complex of strategic infrastructure projects
- › Creative industries in developing the potential of the Far East regions: Russian and international experience
- › Establishment of large joint travel companies with representative offices in both countries
- › Investment projects of infrastructure tourist facilities for mass tourism
- › The potential of ecotourism, industrial and other types of tourism in the Far East
- › Advertising and media efforts to attract tourists to the region and the Far East
- › Presentation of an interregional product from “Harbin to Heihe through the Russian Far East”
- › About the interregional project “BAM Tourist” and possible measures to support it

## HARMONIZATION OF ENVIRONMENTAL AND SOCIO-PUBLIC INTERESTS WITH SIMULTANEOUS DEVELOPMENT OF TECHNOLOGIES: NATIONAL PRIORITIES

- › The Economics of Global Environmental Services: Challenges, Vision and Solutions
- › How to ensure a balance between the economic growth of the region and environmental protection?
- › Issues of conservation and enhancement of biodiversity in transboundary conditions
- › Ensuring unity of measurements and assessment of natural capital in all BRICS countries, creating a system of criteria for medical examination of natural systems
- › Development of nature-like technologies and Best Available Technologies (BAT/BAT)
- › The use of soil conservation and resource-saving agriculture as an international system for improving soil quality and the sustainability of natural-anthropogenic BRICS complexes
- › International cooperation in the field of low-carbon technologies, green finance, adaptation to climate change, climate projects
- › Production of mass natural products or deep processing - choosing strategies
- › Measures to support renewable energy sources in the Amur region and adjacent regions

## MAIN ISSUES OF RUSSIAN-CHINESE COOPERATION IN THE FAR EAST - CONSTRUCTION OF BRIDGES AND OPENING OF GATES

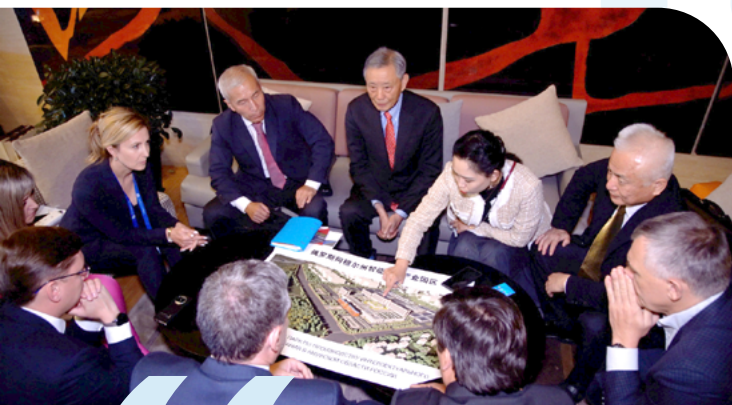

- › Development of a common value orientation between Russia and China
- › What will Russian-Chinese cooperation look like in the coming decades?
- › What is the content of the agenda for this cooperation, is it possible to plan it?
- › What steps need to be taken to ensure successful cooperation not only along the Moscow - Beijing line, but also along the Blagoveshchensk - Heihe bridge?
- › Russia and China - searching for synergy in the food agenda
- › Creation of a Center for Russian-Chinese business cooperation of federal significance in Blagoveshchensk
- › Cooperation and creation of joint productions, enterprises, laboratories, technology parks
- › Designing and holding of joint congress, exhibition, forum and other events
- › 2024 - 2025 — Russia-China cross-years of culture
- › New projects for the next decade. Finding optimal ways to realize common interests
- › What else do we need to learn about each other so that the national traditions and development strategy of the two countries become a bridge on the path to mutual prosperity and contribute to success in trade, education and science?

## "MASTER CLASS": CASES OF ENTERING THE MARKETS OF TWO COUNTRIES

- › Joint study of best practices for entering the markets of two countries: creation of joint projects; development of high-quality analytics and expertise, taking into account regional and national traditions
- › How to avoid mistakes in planning, marketing, operational and financial activities when entering a new market?
- › What factors are important to consider in advertising and product promotion?
- › What factors are important to consider in advertising and product promotion?
- › What associations and business alliances could help promote goods and services?

# «WE'RE GLAD TO COOPERATE!»

The interest of potential foreign investors in our region is growing every year. More and more often they speak about intentions to open production facilities here and ask for relevant consultations. In addition to trade, the priority areas that are most attractive to foreign investors in Priamurye are mining and the creation of production facilities based on them, processing of agricultural products, as well as the construction of logistics centers and warehouses.

*We accept projects for support and manage them from the inception of an idea to the launch of production on a one-stop-shop basis.*

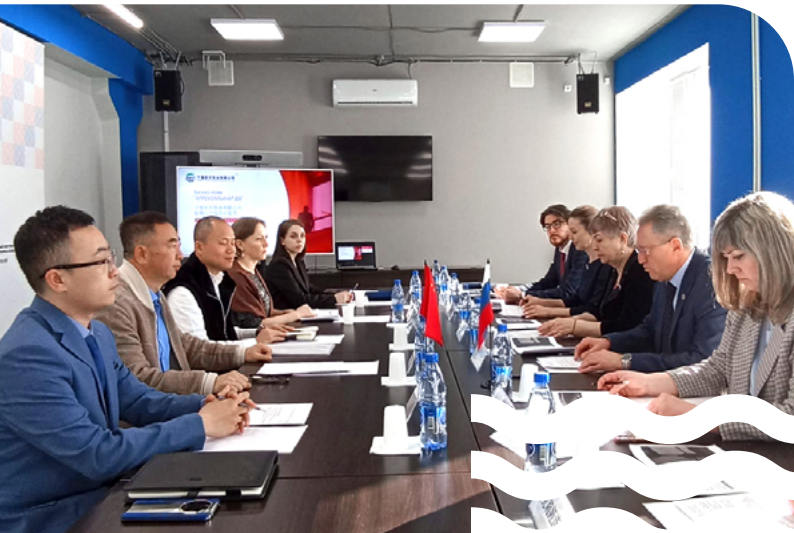

**Olga Temchenko**

*Director of the Investment Attraction Agency of the Amur Region*

We have vivid examples when plans turn into productive cooperation. In particular, together with Chinese investors, a cross-border cableway over the Amur river is under construction. The facility will connect the banks of Blagoveshchensk (RF) and Heihe (PRC). A project on deep wood processing is being successfully implemented in the urban-type settlement of Fevralsk in the Amurskaya advanced development territory. And this is not a complete list of projects involving foreign investors.

Investment portal  
of the Amur Region  
[invest.amurobl.ru](https://invest.amurobl.ru)

Dear investors, the Agency team will continue to do its best to make you happy with business hospitality in our region! Come to us with your ideas and questions. We will consult you, work out the details so that the projects get a chance for realization, and with knowledge and enthusiasm we will take them for professional support. We look forward to work with you!

# TURN TO THE EAST

Orlov Vasily  
Governor of the Amur Region

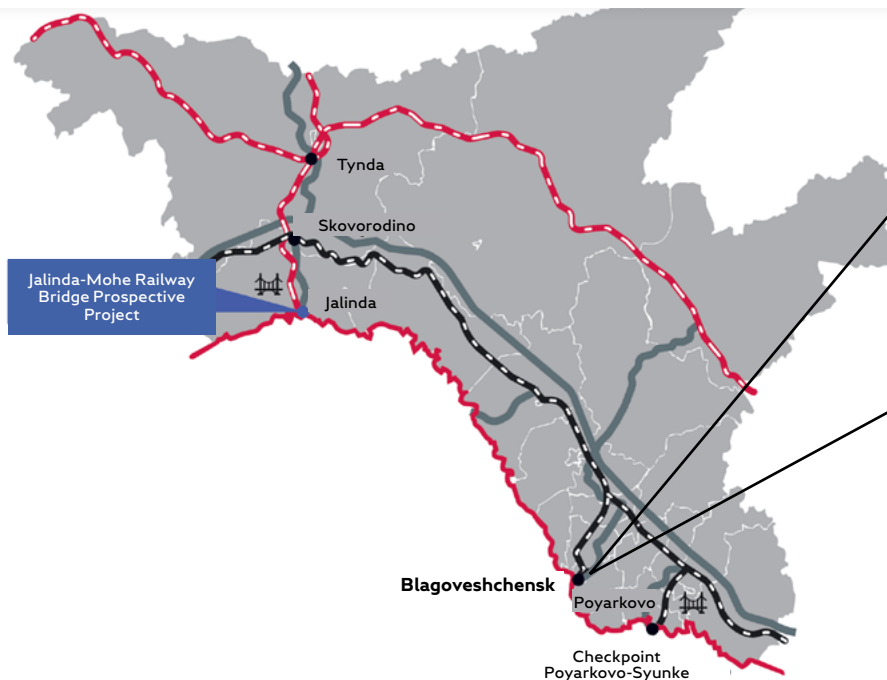

“Every year the role of the Amur region as a key transit center of the Far East is growing. Nationally historically important bridges are being built, and unique investment projects are being implemented. Plans are made for the Amur region due to the need to expand the bandwidth of BAM. Infrastructure creates business opportunities. At the expense of the Amur region logistics chain is reduced for some enterprises by 2 thousand kilometers. The Amur region is a territory that helps Russia make a turn to the East».

## PROJECTS UNDERWAY

### DEVELOPMENT OF THE KUN-MANYE COPPER-NICKEL ORE DEPOSIT

Kun-Manye JSC

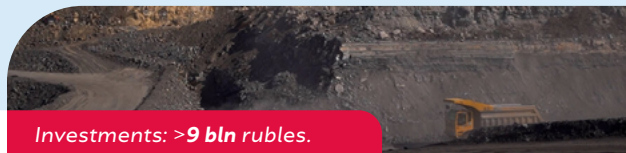

*Investments: >110 bln rubles.*

The project involves the construction of a mining and processing plant in the Zeya District with a capacity of over 7 million tons of ore per year, producing over 30 thousand tons of nickel per year and 8 thousand tons of copper per year. More than 1,700 people will be able to work at the production facility.

Kun-Manie is one of the largest undeveloped deposits in the region, rich in various minerals. These include nickel, copper, cobalt, sulphur, platinum, palladium, gold and silver.

### INTEGRATED DEVELOPMENT OF THE OGODZHINSKOYE HARD COAL DEPOSIT

Ogodzhinskaya Coal Company LLC

*Investments: >9 bln rubles.*

A complex of seven enrichment plants will be built in Selemdzhinsky District. The planned commissioning date is 2028. The total capacity of the complex is more than 30 million tons per year. Total reserves and resources: 2.8 billion tons of coal grades D, G, SS, T, A. Construction of the first plant is already underway. The project is included in the long-term program «Development of the coal industry until 2035» approved by the Government of the Russian Federation. Its implementation will create 14-15 thousand jobs.

### REHABILITATION AND MODERNIZATION OF THE TITANIUM-MAGNETITE ORE MINING AND PROCESSING COMPLEX

Baikal-Amur Mining Corporation JSC

*Capacity: 2.6 million tons per year of saleable ore*

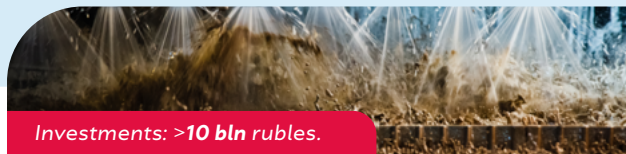

*Investments: >4 bln rubles.*

### INTEGRATED DEVELOPMENT OF THE ELGA GOLD DEPOSIT FOR THE PURPOSE OF EXTRACTION OF ORE GOLD

Atlas Mining Group

*Capacity: extraction of 3.5 thousand tons of ore/year  
production of 2.5 tons of gold per year*

*Investments: >10 bln rubles.*

## CONSTRUCTION OF TWO MORE HYDROELECTRIC POWER PLANTS IS ON THE HORIZON

On September 11, 2023, the Government of the Amur Region and PJSC RusHydro signed an agreement on cooperation in the implementation of investment projects for the construction of the Nizhne-Zeya and Selemdjinskaya HPPs. The first hydropower plant with an installed capacity of 400 MW is planned to be built on the Zeya River, and the second with an installed capacity of 100 MW on the Selemdzha River. - on the Selemdzha River. The planned construction period of the facilities is 6 and 7 years, respectively.

In 2023, PJSC RusHydro has started to perform the first-priority pre-project survey work. Programs for engineering surveys have already been reviewed and approved, and the necessary equipment is being selected.

## RUSSIAN AND CHINESE COMPANIES INTEND TO JOINTLY BUILD A WIND FARM IN THE AMUR REGION

This is a renewable energy project unique for the region. A corresponding agreement was signed at WEF-2023 by the energy and metallurgical holding company En+ with the Amur Region Government and the Far East and Arctic Development Corporation (FEDC).

«Priamurye is a leader in the production of electric power in the Far East, at the same time, we are constantly increasing generation in the region. Now the focus is shifting more towards clean energy and renewable energy sources. A solar power plant is being prepared for construction. Together with the wind farm, this will create a full-fledged energy cluster in the Amur Region with a focus on new technologies and clean energy,» said Pavel Puzanov, Deputy Chairman of the Government of the Amur Region.

Under the terms of the agreement, the company will assess the suitability of natural and climatic conditions prior to the construction of the park. For this purpose, a measuring mast will be built in the region. It will help to collect data for selecting the optimal configuration of the wind farm. After that, the investor will make a final decision on the project's implementation and will start design and construction.

Russian energy and metallurgical holding En+ is one of the world's leading producers of low-carbon aluminum and renewable electricity. China Energy, a Chinese state-owned corporation, will be the technological partner of the project.

Intending to invest 60 billion rubles in the project implementation. The capacity is about 1,058 MW.

### AN INDUSTRIAL PARK FOR FURTHER PROCESSING OF THEIR PRODUCTS IS PLANNED TO BE ESTABLISHED IN SVOBODNY DISTRICT NEAR THE AMUR GAS PROCESSING PLANT AND THE AMUR GAS CHEMICAL COMPLEX UNDER CONSTRUCTION

Potential residents - projects of low-tonnage chemistry and processing of polyethylene and polypropylene. A huge number of products can be produced from polymers that are somehow present in various spheres of our life. Ready-made processing cases are already waiting for investors willing to engage in this activity.

The potential territory of the industrial park is 120 hectares. The proximity of the territory to the sources of potential raw materials and minimal logistics costs for its delivery for park residents, the availability of road infrastructure, the advanced development territory regime, high competitiveness of products and other factors should contribute to investor activity.

## READY-MADE RECYCLING CASES ARE WAITING FOR INVESTORS

### PRODUCTION OF DISPOSABLE MEDICAL SYRINGES

Capacity: **480 mln pcs** per year

Investments: **RUB 1,630 mln.**

### BIG BAG AND WAGON LINERS PRODUCTION

Capacity: **8,000 tons** of products per year

Investments: **RUB 360 mln.**

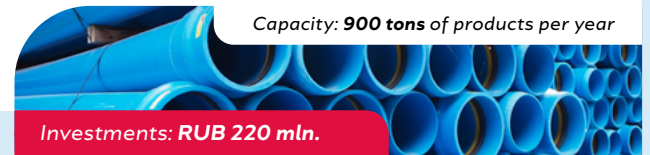

### PACKAGING PRODUCTION

Capacity: **100 tons** of products per year

Investments: **RUB 80 mln.**

### PRODUCTION OF HEATING, WATER SUPPLY AND DRAINAGE PIPES

Capacity: **900 tons** of products per year

Investments: **RUB 220 mln.**

### TANK AND CANISTER PRODUCTION

Capacity: **900 tons** of products per year

Investments: **RUB 80 mln.**

# FRIENDSHIP WITHOUT BORDERS

The two banks of the border river Amur between the Russian Blagoveshchensk and Chinese Heihe, which are separated by only 750 meters, are connected not only by economy, but also by culture, art, and sports. This is clearly confirmed by the already traditional events aimed at strengthening relations and developing friendly ties between Russia and China.

In winter, an entire sports quarter is developed along the Amur River fairway in order to hold the International Russian-Chinese Winter Sports Festival.

This year's opening of the Russian-Chinese Winter Games began with the presentation of the first international ice postcard. It was painted on the Amur River by Russian and Chinese artists. A total of 40 artists participated in the creative process! On the postcard they depicted a brown bear and a panda - symbols of friendship between the two countries, as well as dragons - the patrons of the current year according to the Eastern calendar.

A bright exciting event on the Border River is the Sodruzhestvo International Friendly Ice Hockey Match. The event proves that sport unites nations, continues the traditions of friendship and sports cooperation, and serves as an inspiration for new generations of hockey players striving for grandiose achievements and sporting glory.

The neighbors share their cultural experience from June to August as part of the Russian-Chinese Culture and Arts Fair. On both sides of the Amur River, festival guests enjoy thematic exhibitions, master classes, concerts, meetings with creative people, and presentations covering various aspects of culture and art of both countries.

The exhibition has become a significant platform for the exchange of cultural values and traditions. It brings new ideas and opens perspectives, attracting the attention of artists, cultural representatives, art critics and spectators from Russia, China and other countries.

International rally on the Amur River. There is a special atmosphere, solidarity between the participants, despite the sporting rivalry. It is a celebration of sports and friendship, which promotes sports values and attracts a lot of attention from fans.

Photo: official website of the festival [amurartfair.ru](http://amurartfair.ru)

International Russian-Chinese youth table tennis competition bring together young tennis players from Russia and China. It is held at a professional level and is aimed at encouraging and supporting young talented players. The event includes different age categories and difficulty classes, which allows athletes to show their skills and potential and gain the experience necessary for further development.

The program of the chess festival «Stroke of the Horse» includes competitions in classical, rapid and Swedish chess, simultaneous play sessions with a grandmaster, an international online tournament «Friendship Match» between children and young men from the Amur Region and the PRC, as well as blitz tournaments. Last year 230 people - children and adults - took part in the festival.

The international Russian-Chinese children's friendly soccer competition is organized to strengthen cultural and sports ties between Russia and China, as well as to stimulate the children's soccer movement. In 2023, more than 800 young soccer players from the two countries took part in it.

Photo: Government of the Amur Region

Another event is the Druzhba international swim. It used to be held across the Amur River, but in 2023 the Zeya River was chosen as the venue. Then the swim united almost 90 sports and healthy lifestyle enthusiasts from Russia and the People's Republic of China. Among them were cold water swimmers, runners from Blagoveshchensk, representatives of various sports federations and ordinary citizens.

Photo: Ministry of Economic Development and External Relations of the Amur Region

In August 2023, the first International Russian-Chinese Gastronomic Festival «Coasts of Taste» was held in Blagoveshchensk. Guests and residents of the Amur Region were welcomed on the Amur River embankment. The large-scale event united more than 30 regional cafes and restaurants on one site. The program of the event included master classes of Russian and Chinese chefs, presentation of skillfully prepared new dishes of national cuisines, as well as unique culinary creations - based on author's recipes.

# EXPLORE AMUR REGION

## TOP 5 MOST VISITED REGIONAL FACILITIES

The Vostochny Cosmodrome, proximity to China, magnificent nature and interesting archeological finds make the tourist opportunities of the Amur Region really unique. Travelers come here to take selfies on the border with China, to visit large-scale industrial facilities, to plunge into the world of ancient legends and shamanism of the indigenous people of the north - Evenks, to catch trophy fish in the seas created by human hands, to look at lotuses blooming in the northern latitudes, and much more. Which locations are the most popular? The Tourist Information Center of the region has compiled on the basis of its data the top 5 objects of attraction for tourists.

# 01

## City of Blagoveshchensk

The capital of the Amur Region and the only administrative center of Russia located on the very border with China. 750 meters of the Amur River separates the capital of the region from the Chinese city of Heihe, and maybe this is the reason why the main attraction of Blagoveshchensk is the embankment, which, by the way, is recognized as one of the most beautiful in the Far East. From here you can enjoy a stunning view of China.

In Blagoveshchensk, architecture lovers can enjoy a walk through the historic city center, where 19th century buildings harmoniously combine with modern structures. Among them are the Triumphal Arch, the Mooritania shopping rows, the Churin and Co. and Kunst and Albers trading houses, the house of merchant Vasily Plusin and other architectural masterpieces that attract visitors with their appearance and rich history. The former building of the trading house «Kunst and

Albers» now houses the Amur Regional Museum of Local Lore named after G. S. Novikov-Daursky. It houses an extensive collection of exhibits, including archaeological finds, works of art, photographs and documents reflecting the history of the region.

Another highlight of the Amur capital is the private museum «Kalachnaya». Visitors are invited to take part in fascinating master classes on molding real Russian kalach, as well as attend a unique interactive tour right on the plate!

For gastronomic tourists Blagoveshchensk can offer a variety of catering establishments. Restaurants of Far Eastern cuisine offer original “Amur” dumplings and dishes made of Amur wild fruits. For fans of Asian cuisine with a «peppercorn» restaurants offer a varied menu of Chinese cuisine.

# 02

## «Vostochny» cosmodrome

In the Amur region  
stars are closer!

It is in the Amur Region that Russia's only civilian spaceport is located. Today, this grandiose facility is open for tourists. At Vostochny, you can get acquainted with the history of Russian cosmonautics and observe production processes, but also see how a rocket is launched into space. If you plan to come to such an event, you can find out the launch schedule on the Roscosmos website (0+).

The region is proud of the fact that the President of Russia once chose the territory in the Amur Region for the construction of the first civilian cosmodrome. On April 11 this year, the first launch of the Angara-A5 heavy rocket took place at Vostochny. It was sent into orbit with the Orion upper stage and a test payload.

«Angara-A5» is a three-stage heavy-lift launch vehicle that uses oxygen and naphthyl, so it is environmentally friendly. «Angara», being able to lift up to 24 tons, can launch various spacecraft into orbit.

The Amur Cosmodrome is located 180 km from Blagoveshchensk near the new scientific town of Tsiolkovsky. The facility is a restricted one, and excursions must be purchased at least 21 days before the trip in order to have time to issue the relevant documents. As part of the excursion programs, tourists are introduced to the technical and launch complex, as well as the heart of the cosmodrome - the mobile tower!

# 03

## Tukuringra Ridge

Tourists especially appreciate places shrouded in mysteries and legends. Some of them like to be far away from civilization with complete lack of communication and maximum proximity to nature. That is why every year many tourists make an ascent to the Tukuringra Ridge. The point is located in the Zeya Nature Reserve.

The Evenks, the indigenous northern peoples of the Amur region, have a legend. A long time ago, a powerful chief ruled in these lands and he had a beautiful daughter named Tukuringra. The girl fell in love with a simple hunter Soktakhan, but the chief thought he was not a match for such a beautiful girl. You can learn the story of how the chief separated the lovers during the tour to the ridge.

Travelers, tired of the city noise and bustle, immerse here in the mysterious atmosphere of the mountain tundra, left alone with their thoughts in the silence, which can be disturbed only by the noise of trees and babbling brooks. Mountain shelters located in such places offer travelers views of indescribable beauty. And the way to the route lies through the town of hydro-builders Zeya, where one can admire the majestic dam of Zeya hydroelectric power station and visit the atmospheric museum of gold mining history.

*Photo: Tourist Information Center of the Amur Region*

# 04

## Norsky reserve

Another place of attraction for travelers is the Norsky Reserve. It is located in the Selemdzha district between two rivers - the Nora and the Selemdzha. Its area is 211,000 hectares. Its forests are home to many animals, birds and plants. It is the youngest and the largest reserve in the Amur Region, and in Russia it is the first mare reserve. «Mary» means «swamp» in the Evenki language. In this area there are many wetlands formed under the action of permafrost. They conserve water and feed the rivers.

The reserve was established in 1998 to preserve typical mare landscapes and one of the world's largest migratory groups of Siberian roe deer. During the migration period from 5 to 7 thousand heads of these graceful animals are observed in Norsky every day.

In the fall, moose descend to the reserve, and in winter the largest owl on the planet, the fish owl, nests here.

On the territory of the reserve there is the Burundi deposit of semiprecious chalcedony stones of different kinds: sarderes carnelians, carneolas, agates. You can't collect them, but you can admire them.

The reserve welcomes tourists to its cordons in summer, fall, and also offers winter routes.

# 05 Tynda BAM capital

Photo: bamtravel.ru

In 2024, the Baikal-Amur Mainline celebrates 50 years since the start of this large-scale construction project. The Baikal-Amur Mainline is one of the world's largest railroads. Its length is 4.3 thousand kilometers. Connecting Eastern Siberia and the Far East, it passes through more than 200 railroad stations and junctions, crossing territories with harsh natural and climatic conditions, areas of permafrost and high seismicity, mountain ranges and large rivers. About 36 km of the road route passes through tunnels.

The BAM began to be laid in 1932, but then construction was frozen until the 1970s. The eastern and western parts of the road were connected in 1984.

Tynda, the northernmost city of Priamurye (880 km from Blagoveshchensk), is considered the capital of BAM.

Tynda railway station is the largest by area of all stations in the Amur region (4 thousand square meters. m.) Not far from it is the Museum of BAM history, the expositions of which tell about the construction and operation of the legendary railroad of Russia.

From Tynda you can plan your trip to the Evenks, raft along the northern mountain rivers, become a prospector for a day at the Solovyevsky mine, the oldest in the Amur region, or go on interregional routes along the Western and Eastern BAM or in Yakutia.
